

TE INDU/4

Le testine capsulatrici **TF** trovano largo impiego nelle industrie costruttrici di macchine e componenti per il settore chimico, farmaceutico, cosmetico ed enologico. Sono applicabili sia su macchine alternate che su quelle rotative a teste multiple e funzionano per una produzione di bordatura-filettatura o per solo bordatura per tappi tipo Pilferproof PFP, UT e Flip-Off su contenitori di vetro o plastica. Disponibile nella versione a 3 e 4 rulli, materiale acciaio inox.

The **TF** capping heads are largely used by manufacturers or machines and components in chemical, pharmaceutical, cosmetic and wine making sectors. They find their application either on alternating machines or on multiple heads rotary machines and can be adapted for edging-threading or edging only for caps type Pilferproof PFP, UT and Flip-Off on glass and plastic containers.

Available in the 3 and 4 rollers model, stainless steel material.

TESTINE CAPSULATRICI CAPPING HEADS

Serie*TI/M*

SUPPORTI ROTANTIROTATING SUPPORT

The **TI/M** adjiustable torsion magnetic capping head is a hysteresis type without jumps (range 0.2-2.0 Nm), is used for closing with plastic and metal pre-threaded caps and capsule. Its main features are: very easy to use, transmission without contact, minimum dimensions, 100% stainless steel material. Connection tail unified with TF series.
